

Gain 360-degree insights into your operations.

Why can't you already act on your data?

- You're bogged down in the manual efforts required to accumulate, analyze, and learn from all of the data in your operations.
- Your data is uncorrelated and incomplete.
- You lack visibility into what is really going on in your mobile operations, despite having a lot of data.
- You're dealing with inaccurate, out-of-date data or inconsistencies with your data quality.

“

During the proof of concept, it became clear how advanced the Tourmo platform and insights were, revolutionizing the way we tackled operations management. We found in Tourmo a trusted advisor and technology partner who is helping us transform our company. Their ability to quickly make a significant impact on our bottom line was truly impressive.

”

Automated Operations Insights Workflows

- **Better Insights:** Understand your business on a deep level. Make faster and more informed decisions.
- **More Efficiency:** Automate your analytics. Address problems before they occur.
- **Lower Costs and Risks:** Optimize performance. Reduce manual labor.
- **Improved Workflows:** Automatically initiate desired actions. Track that actions are taken.

Make better decisions faster and share more information with our AI-driven platform.

Operations Insights will help you capture and leverage all of the data generated by your operations to make better decisions and take action sooner. Surface trends, patterns, and dependencies, and deliver the right information to the right people at the right time.

Features

- **Unguided Discover:** We use AI to automatically harmonize disjointed datasets and reveal correlations within your data. We present these correlations to surface valuable insights about your operations and give you new ways to improve your business.
- **Predictive Insights:** The correlations uncovered within your operations' data allow us to identify valuable insights that can predict outcomes. You can then use these insights to improve the outcomes.
- **Population-based Insights:** Our AI platform utilizes an advanced method called population-based learning, which decomposes the data from your operations into populations of data points that have the same context. Taking into account the context during comparative analysis leads to unbiased insights.
- **Accurate Insights:** Our system retains the full history and granularity of your data to train our AI for more accurate predictions. All insights are available for data visualization and further analysis through our included business intelligence (BI) tool.
- **Workflow Management:** Tourmo's AI-powered business process management features deliver automation, task management, insights, and transparency across company organizations to reveal the value from your data and integrate it back into your workflows.
